

# WS5: Safety procedures (PD)

Learner: \_\_\_\_\_ Date: \_\_\_\_\_

## Task 1 Fire alarm procedure (1:1.6,)

List the steps to be taken if the fire alarm sounds whilst you are using a machine.

---

---

---

---

---

## Task 2 Reporting presence (1:2.12)

Explain why it is important to use appropriate fire escape routes and then report to your assembly point during an emergency.

---

---

---

---

---

## Task 3 First aid (1:2.10)

Describe the first aid facilities within a specified engineering area.

Area: \_\_\_\_\_

---

---

---

#### Task 4 Dangerous occurrences and malfunctions (1:2.11)

For the area mentioned in Task 2, state at least three dangerous occurrences/ malfunctions (not specific to a machine) which should be reported.

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

#### Task 5 Fire fighting procedures (1:2.13)

Read the 'FIRE AND EMERGENCY EVACUATION PROCEDURES' document.

Summarise what action should be taken on discovering a fire?

---

---

---

---

---

---

What are the most common causes of fire in a workshop environment?

---

---

---

What can you do to prevent fire from occurring?

---

---

---

**Witness statement** (1:1.5, 1:1.6, 1:2.6, 1:2.7, 1:2.8, 1:2.13)

Date of fire drill role play: \_\_\_\_\_

A group of students were assembled to partake in a fire drill role play in order to demonstrate their knowledge of emergency procedures and show that they could carry out the necessary actions in the event of a real emergency.

I observed \_\_\_\_\_ show that they could calmly stop the machine they were using and press the emergency stop before making their way towards the nearest exit.

\_\_\_\_\_ was asked what they should do if they noticed a small fire and the response was correct an in-line with the departmental procedure. They also adequately described their responsibilities with regards to dealing with hazards and reducing risks in the workshop which they were able to correctly identify.

In terms of identifying first aiders, \_\_\_\_\_ was able to identify the nearest first aider to the department and correctly described basic steps to take upon discovering both minor and more serious injuries as well as describing how to obtain safety information for the procedures they were expected to complete at college and also in the workplace.
